-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Semura et al 6,077,639.

The cited prior art discloses a toner binder for electrography comprising a polyester resin derived from an alkoxyated BPA and an acid wherein the unreacted bisphenols in the resin is less than 15 ppm. The alkoxyated BPA is purified by treatment with a silicate. See column 1, lines 64-67; column 4, lines 9-16; and column 5, lines 1-35.

3. Claims 1-3, and 7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP 2000137350.

This prior art discloses a toner for electrography comprising a polyester resin derived from a BPA and an acid, and which has unreacted amounts of BPA less than 15 ppm.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1-7 are rejected under 35 U.S.C. 103(a) as being unpatentable over JP 3041045 in view of Semura et al 6,077,639 or JP 2001137350.

The primary reference discloses a method for the preparation of a BPA dihydroxyalkylene ether or an alkoxylated BPA which is treated to provide a high purity product which is used as a glycol component for unsaturated polyester resins. This reference does not disclose the use of the product or unsaturated resin for making toner binder; however, said use would have been obvious in view of the secondary references that disclose or teach the use of unsaturated resins such as disclosed by the primary reference for making toner binder.

6. References listed on PTO-1449 have been made part of the record.

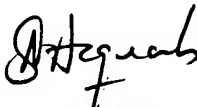

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to SAMUEL A. ACQUAH whose telephone number is 571-272-1065. The examiner can normally be reached on M-TH, FRIDAYS OFF.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, JAMES SEIDLECK can be reached on 571-272-1078. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
